

Ideation Phase

Brainstorm & Idea Prioritization

Date	28 January 2026
Team ID	LTVIP2026TMIDS66236
Project Name	Explore with AI: Custom Itineraries For Your Next Journey
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Template

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

- 10 minutes to prepare
- 1 hour to collaborate
- 2-8 people recommended

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

15 minutes

- Team gathering**
Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.
- Set the goal**
To design an AI-based system that automatically generates personalized travel itineraries based on user input.
- Learn how to use the facilitation tools**
Selected tools include Python, Streamlit, and a pre-trained generative AI model (GPT-4) for brainstorming the latest itinerary generation.

Open article

1 Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

5 minutes

Problem

How might we use generative AI to automate personalized travel itinerary planning efficiently?

Key rules of brainstorming

To run an efficient and productive session

- Sketch freely
- Encourage wild ideas
- Defer judgement
- Listen to others
- Go for volume
- If possible, be visual

Step-2: Brainstorm, Idea Listing and Grouping

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

Tip: You can think of a lot of ideas and then narrow them down to the ones you want to build on.

Person 1

Integrate Gemini generative AI model using API

Design structured prompt for itinerary generation

Tune temperature for varied travel suggestions

Handle AI response formatting

Person 2

Design flight search interface

Add input fields for destination, days, nights

Add Generate Itinerary button

Display output using text area

Person 3

Validate destination input

Ensure days > 0 and nights > 0

Clear unnecessary spaces in input

Format prompt correctly before sending to model

Person 4

Add budget based itinerary customization

Add PDF export feature

Include travel tips in output

Add multi-language support option

3

Group Ideas

Take some time during your storm while clustering similar or related ideas as you go. Once all sticky notes have been grouped, give each cluster a person-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

10 minutes

Tip: An effective brainstorming session is one that is focused on the problem at hand and produces a large number of ideas.

AI & Model Integration

Integrate Gemini generative AI model using API

Create structured prompt for itinerary generation

Tune temperature and output token settings

Handle AI response formatting

User Interface Design

Design simple search interface

Add input fields for destination, days, nights

Add Generate Itinerary button

Display output using text area

Date Validation & Processing

Validate destination input

Ensure days > 0 and nights > 0

Clear unnecessary spaces in input

Future Feature Expansion

Add budget based itinerary customization

Add PDF export feature

Add multi-language support option

Step-3: Idea Prioritization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

Importance

It's hard to know which ideas are most important. One way to do this is to ask yourself: "If I had to choose one idea to build, which one would I choose?"

Feasibility

It's hard to know which ideas are most feasible. One way to do this is to ask yourself: "If I had to choose one idea to build, which one would I choose?"

Tip: Prioritize ideas that are both important and feasible. If you have many ideas, you can use this grid to narrow them down to the ones you want to build on.
